Northwind Solar Ltd.

Annual Report 2025 · Sample document for testing (fictional company)

1. Letter from the CEO

2025 was the strongest year in Northwind Solar's history. Revenue grew by 18% to €12.4 million, driven by our new residential battery product and two large public-sector contracts in Plovdiv and Varna.

We installed 1,240 rooftop systems, up from 960 in 2024, and our customer satisfaction score rose to 4.7 out of 5. At the same time, rising component prices in the first half of the year put pressure on our margins.

In 2026 we will focus on three priorities: expanding battery storage, entering the Romanian market, and reducing installation time from 3 days to 2 days per system.

— Elena Petrova, Chief Executive Officer

2. Highlights

- Revenue: €12.4 million (+18%)
- Net profit: €1.1 million (2024: €1.3 million)
- Rooftop systems installed: 1,240
- Employees: 86 (2024: 71)
- New product: the NW-Store 10 kWh home battery, launched in April 2025

3. Financial results

€ thousand	2025	2024	Change
Revenue	12,400	10,510	+18%
Cost of sales	8,930	7,250	+23%
Gross profit	3,470	3,260	+6%
Operating expenses	2,150	1,780	+21%
Net profit	1,100	1,300	-15%

Net profit fell by 15% even though revenue grew. The main reasons were higher prices for solar panels and inverters in the first half of the year (+12% on average) and the hiring of 15 new installers ahead of the 2026 expansion.

4. Revenue by segment

Segment	2025 (€ thousand)	Share
Residential rooftop systems	6,820	55%
Home batteries (NW-Store)	2,480	20%
Public-sector projects	2,230	18%
Maintenance and service	870	7%

5. Risks

- **Component prices:** about 70% of our panels come from two suppliers. A 10% price increase would reduce net profit by roughly €400,000.
- **Subsidies:** the national home-solar subsidy programme ends in June 2026. Demand for residential systems may fall in the second half of 2026.
- **Staff:** qualified installers are hard to hire. Employee turnover was 14% in 2025.

6. Outlook for 2026

We expect revenue of €14–15 million in 2026. We plan to open an office in Bucharest in March 2026 and to invest €900,000 in a new training centre for installers. The board proposes a dividend of €0.05 per share, payable on 30 June 2026.
